

Editorial Note

Greetings! We thank all the readers and well-wishers of the Journal of Development Economics and Management Research Studies (JDMS).

We congratulate our Honourable Prime Minister Shri Narendra Modi and his new Cabinet Team for taking our country onward and forward to achieve his objective of a \$7 trillion economy. In his favour, the GDP is growing as propelled by the economic reforms. The growing usage of AI, geopolitical issues around the world, and climate change. Carbon target, enhancing skilled labour force, agriculture and industrial sector requires attention in policy formulation. ‘Drinking water for all’ needs special attention. Further improvement in roadways, railways, airways and waterways is required. India needs a long-term plan to address the waste, especially in urban waste management. The policies are to be framed at the micro level to achieve an all-round and healthy development of our country.

We invite scholarly articles from interested scholars across the field as per the guidelines given on our website <https://www.cdes.org.in/about-journal/>.
